

# Breast Cancer Screening Guideline

## Assessment for Risk of Breast Cancer Summary

- Women Age 30-39 should evaluate their risk for breast cancer with their PCP

### For women at Average Risk

- Age 40-74 women should get mammograms every year
- Women age 75+ should discuss with their PCP and determine plan for ongoing screening

### For women at High Risk

- Start screening at age 30 with mammogram and Breast MRI if indicated
